**SWISS WOOD**

**DE** Holz ist der Werkstoff für eine nachhaltige Zukunft schlechthin. Es ist ein fantastischer CO<sub>2</sub>-Speicher und zudem wächst in der Schweiz jährlich mehr Holz nach, als geerntet wird. SWISS KRONO Produkte bestehen zu fast 100% aus Schweizer Holz – natürlich aus nachhaltiger Forstwirtschaft. Damit halten wir die Transportwege kurz, erreichen ausgezeichnete Ökobilanzen und bringen Ihnen ein Stück Schweizer Wald nach Hause.

**EN** Wood is the material par excellence for a sustainable future. It is a fantastic CO<sub>2</sub> reservoir and what's more, the wood grown in Switzerland exceeds the amount harvested per year. SWISS KRONO products are made of almost 100% Swiss wood – naturally from sustainable forestry. This helps us keep transport distances short, achieve excellent eco-balances and bring a piece of the Swiss forest home to you.

**FR** Le bois est le matériau par excellence pour un avenir durable. C'est un fantastique réservoir de CO<sub>2</sub>. Qui plus est, il pousse chaque année en Suisse plus de bois qu'il n'en est récolté. Les produits SWISS KRONO sont composés quasiment à 100% de bois suisse – naturellement issu de la gestion durable des forêts. Nous réduisons ainsi les distances de transport, obtenons d'excellents bilans écologiques et ramenons chez vous un morceau de forêt suisse.

**IT** Il legno è il materiale per eccellenza per un futuro sostenibile. È un fantastico serbatoio di CO<sub>2</sub> e inoltre, in Svizzera cresce ogni anno più legno di quello che viene raccolto. I prodotti SWISS KRONO sono realizzati con quasi il 100% di legno svizzero, naturalmente proveniente da silvicoltura sostenibile. Questo ci permette di minimizzare i percorsi di trasporto e di raggiungere un'eccellente ecobilancio, portando a casa vostra un pezzo di foresta svizzera.

**ES** La madera es el material por excelencia para un futuro sostenible. Es una fantástica reserva de CO<sub>2</sub>. Además, en Suiza cada año crece más madera de la que se recoge. Los productos de SWISS KRONO se fabrican con casi un 100% de madera suiza que procede, por supuesto, de silvicultura sostenible. Así mantenemos los trayectos de transporte cortos, conseguimos excelentes equilibrios ecológicos y le llevamos un trozo de bosque suizo a casa.

**PT** A madeira é o material por excelência para um futuro sustentável, pois atua como um fantástico reservatório de CO<sub>2</sub>. Além disso, todos os anos cresce mais madeira na Suíça do que a que é extraída. Os produtos SWISS KRONO são quase totalmente constituídos por madeira suíça, naturalmente proveniente de silvicultura sustentável. Assim, asseguramos curtas distâncias de transporte e excelentes equilíbrios ecológicos, além de levarmos um pouco da floresta suíça para a sua casa.
